## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:  
The closest prior art shows show texture memory transferring image to interpolation block for outputting texels values but does not disclose a processor including a generating section which generates a defocused image for an original image by setting the original image as a texture and shifting a texture coordinate of the object when the texture is mapped on the object by a texel interpolation method. An image generating system for generating a defocus image has the processor.
